Mike Brinkmiller will be acting today, but since Dan is already engaged in the WV methods question and more familiar with the topic, he said that he will follow up with an update. He's following email via Blackberry.

Hope you feel better Greg. Probably the most time sensitive issue I am aware of is the need to support ATSDR and the Region 3 lab in analytical methods for PPH (the additional chemical in the WV spill). I don't know if there is anything specific we need to do today but Becki asked us to help out late on Friday afternoon. Dan reached out to Region 3 but its not clear to me if we are engaged in any activity. If you could have whoever is acting today update Phil and I prior to the OGWDW meeting at 3:00 that would be great. Thanks

Ex. 6 - Personal Privacy I'll be calling in for the UCMR weekly meeting at 930 and Partnership for Safe Water Steering Committee meeting at 2, and I'll catch up on email, but am otherwise going to take it easy.

Dan is in Louisville for the TNI conference this week so I'll determine who is acting later this morning and will let you know.
